Research Papers

Controls on groundwater chemistry in subalpine catchments in the southern interior of British Columbia
R.O. Hudson and D.L. Golding 1
The distribution of wind-driven rainfall in a small valley: an empirical basis for numerical model verification
D. Sharon and A. Arazi 21
Coupling of the time domain random walk method with the finite fragment method to simulate flow and transport in 1-D heterogeneous media
O. Banton, G. Porel and F. Delay 49
Variability of pool characteristics with pool type and formative feature on small Great Basin rangeland streams
T. Myers and S. Swanson 62
Hydrograph separation using stable isotopes, silica and electrical conductivity: an alpine example
H. Laudon and O. Slaymaker 82
Particle size distributions in waters from a karstic aquifer: from particles to colloids
O. Atteia and R. Kozel 102
Modeling saltwater upconing in a freshwater aquifer in south–central Kansas
T.S. Ma, M. Sophocleous, Y-S. Yu and R.W. Buddemeier 120
The efficiency of depth-integrating samplers in sampling the suspended sand load in gravel bed rivers
D.M. Hicks and M.J. Duncan 138
Numerical solution of 3-D groundwater flow involving free boundaries by a fixed finite element method
A. Larabi and F. De Smedt 161
Hydrodynamic dispersion in an artesian aquifer during flow to a partially penetrating well
L. Ridolfi and S. Sordo 183
Water flow modeling in the unsaturated zone with imprecise parameters using a fuzzy approach
K. Schulz and B. Huwe 211
Stable isotope tracers: natural and anthropogenic recharge, Orange County, California
A.E. Williams 230
Western US streamflow and atmospheric circulation patterns during El Niño-Southern Oscillation
T.C. Piechota, J.A. Dracup and R.G. Fovell 249
Development and test of the distributed HBV-96 hydrological model
G. Lindström, B. Johansson, M. Persson, M. Gardelin and S. Bergström 272
Approaches to continental scale runoff for integrated assessment models
D.N. Yates 289
Distributed parameter hydrology model (Answers) applied to a range of catchment scales using rainfall simulator data. IV Evaluating pasture catchment hydrology
R.D. Connolly, C.A.A. Ciesiolka, D.M. Silburn and C. Carroll 311
A macro-scale natural hydrologic cycle water availability model
A.H. Slutsky and B.C. Yen 329
Sources of solar radiation estimates and their effect on daily potential evaporation for use in streamflow modeling
S.D. Lindsey and R.K. Farnsworth 348
Forest floor water content dynamics in a Douglas fir stand
M.G. Schaap, W. Bouten and J.M. Verstraten 367

Book Reviews

Mediterranean Desertification and Land Use, C.J. Brandt and J.B. Thornes 384
Contemporary Hydrology: Towards Holistic Environmental Science, R. L. Wilby 385
Climates of South Asia, G.B. Pant and K. Rupa Kumar 387
Methods in Stream Ecology, F.R. Hauer and G.A. Lamberti 388
